Another aspect of the Virtual NERGC 2021 is a set of 60 additional presentations that are recorded and available 'on-demand' until May 31, 2021.

Of course, we are also including various activities throughout the 61 days to keep you engaged with this conference event – Special Interest Groups, Ancestor Road Show, Society Fair, and Library & Archive. These events will be Live and not available on demand so we can have interactions with the participants

They are all traditional activities that will be carried into our Virtual Environment for 2021.

And, absolutely, our Exhibit Hall, open 24x7 for 61 days, with many vendors opting to include scheduled appointments and/or video chats as optional activities at their booths.

DNA testing plan to answer difficult genealogical research questions, Angie gets the job done. She has been researching the history of her own family for over 20 years and has helped many individuals in identifying their ancestors and discovering details about their lives. She has significant experience in software and web-based technologies, is familiar with key websites relevant to family history research, and has hundreds of hours spent poring over records housed by the Family History Library in Salt Lake City, Utah.

A speaker at regional and national conferences including live videocasts at RootsTech 2011 and 2012, Myrt is co-founder of the Genea-Quilters group on Facebook, and founder of GeneaWebinars, a centralized calendar and blog for all known genealogy webinar hosts and virtual presenters.
